

Barely Legal Cafe Modding Guide!

Hi! If you want to add your own custom character to Barely Legal Cafe (shortened to BLC in this guide), then follow this step by step guide!

1. Duplicate the example_mod folder

The folder called **example_mod** has all the files you need to create your own custom character, so just copy it and rename it to whatever you want to call your mod.

We recommend using a name that's unlikely to be used by someone else, so I'm naming my mod **"Gopher's_Amazing_Cool_Outlandish_Mod"**, just rolls of the tongue doesn't it?

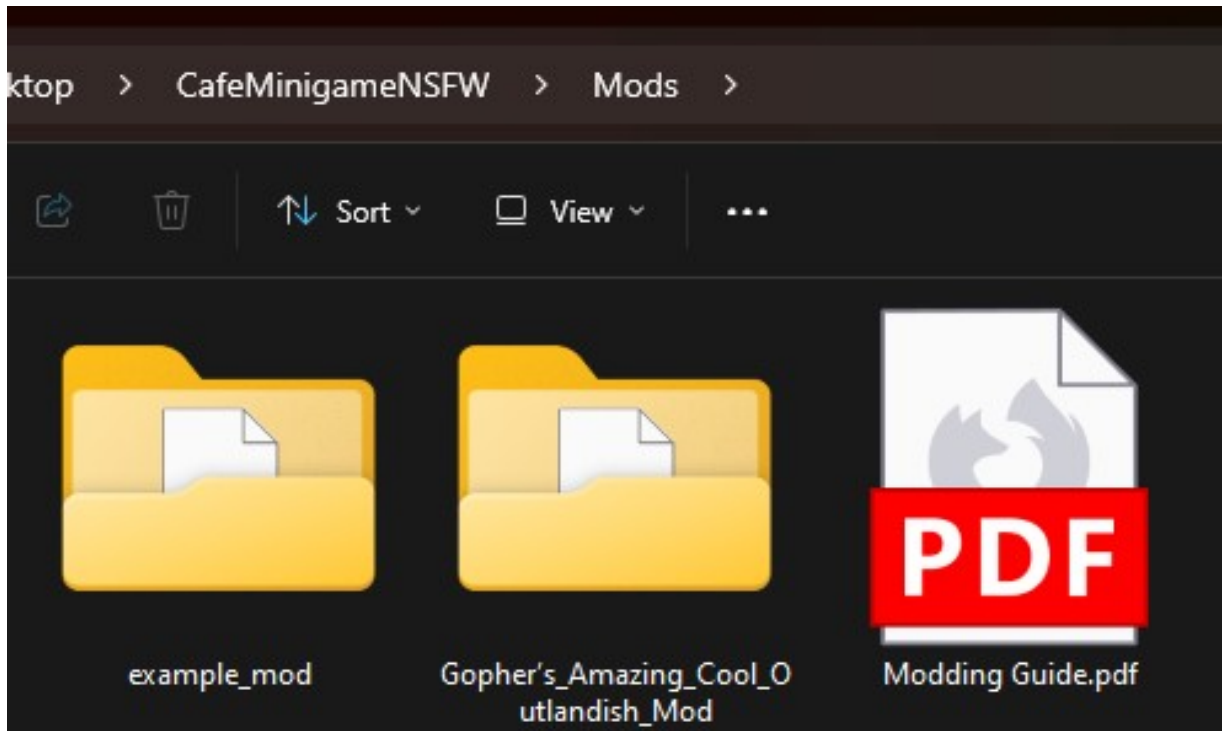

Figure 1: Your mod folder should look similar to this now

2. A look inside our newly created mod folder

Our new folder has 6 images, 2 for our character's body and 4 faces.

Here's a description of them:

- Customer.png – The normal texture of the customer
- CustomerSex.png – The texture of the customer when they're having sex, you know, the naked one.
- Normal.png – The default face of the customer.
- SexNormal.png – The face the customer makes during sex.
- SexNearCum.png – The face the customer makes when they're about to bust the fattest nut of their lives.
- SexCum.png – The face the customer makes when they're busting the aforementioned nut.

3. Editing the files

Now, just edit the files however you like in a program of your choice!

4. Checking the results

Now start the game, and look in the upper left-hand corner and see if the game says that your mod was loaded, it should look similar to this:

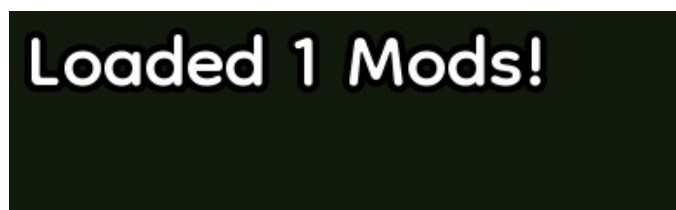

Figure 2: The text confirming that our mod was loaded successfully

5. You're Done!

Congrats on adding your own character to the game! If you wanna share your mod with others, feel free to do so in our [Discord Server!](#)
