How Do Free Lookups Compare to Paid Plan Lookups?

Upgrade to avoid missing fraudulent and high risk phone numbers. All [upgraded plans](#) have access to better blacklists that significantly expand behavior patterns and detection rates for high risk phone numbers. Many of the worst phone numbers that facilitate abusive users online are via **hidden VOIP providers**. Upgraded plans have access to premium blacklists with millions of hidden and secret VOIP providers, along with compromised devices collected by our network of proprietary honeypots. Free account plans are limited to checking only a small portion of that data, leaving large gaps in coverage.

Don't let fraudulent phone numbers slip by undetected. [Upgrade your account](#) for better accuracy and premium features.
